Introduction Board

Thank you for taking the time to attend this public exhibition of the proposals for the new St Clements Surgery.

The site is located within Winchester City centre, 150m from the existing surgery in an accessible location. The site is around 160m from the High Street, on the junction between Friarsgate and Upper Brook Street. It is currently occupied by a 60- space public car park, and has been considered a suitable site for a healthcare facility, which replaces the existing building on Tanner Street.

The original scheme, for the same site, received planning approval in 2012, but this permission expired earlier this year. The replacement surgery is closely based on the previously agreed design but incorporates some changes to reflect the current needs of the practice.

Please take your time to look around the exhibition and feel free to ask members of our project team, or representatives from the surgery, any questions about what you see. We are keen to hear your feedback, and forms are available for you to leave your views with us.
