

PORTFOLIO HOLDER DECISION NOTICE

INDIVIDUAL DECISION BY THE PORTFOLIO HOLDER FOR ECONOMIC PROSPERITY

TOPIC – ECONOMIC PROSPERITY DETAILED CHANGE PLAN 2011/12

PROCEDURAL INFORMATION

The Access to Information Procedure Rules – Part 4, Section 22 of the Council's Constitution provides for a decision to be made by an individual member of Cabinet.

In accordance with the Procedure Rules, the Corporate Director (Governance), the Chief Executive and the Head of Finance are consulted together with Chairman and Vice Chairman of the Principal Scrutiny Committee and all Members of the relevant Scrutiny Panel (individual Ward Members are consulted separately where appropriate). In addition, all Members are notified.

Five or more of these consulted Members can require that the matter be referred to Cabinet for determination.

Contact Officer:

Committee Administrator:

Nancy Graham, Tel: 01962 848 235, Email: ngraham@winchester.gov.uk

SUMMARY

Approval is sought for the Detailed Change Plan for Economic Prosperity attached at Appendix 1. The Plan sets out the key programmes and actions to be undertaken by the Council and its partners during 2011/12 in support of the economic prosperity outcome of the Winchester District Sustainable Community Strategy.

The plan is divided into four themed areas of work, in line with the Economic Strategy for 2010 – 2020. The main issues, opportunities and existing activity relating to each theme is summarised at the start of each section. Targets designed to drive progress against these themes are, wherever possible, SMART (Specific, Measurable, Achievable, Resourced and Timed) and include by a number of milestones to assist Members in monitoring progress through the Scrutiny and Overview Committee.

Key actions to be undertaken to deliver real change under the economic prosperity outcome are:

- taking forward the Silver Hill project to create a vibrant new quarter of the Town;
- identifying funding for low carbon enterprise (eg through a Community Bank);
- progressing work on the Local Development Framework in line with new Government requirements and timescales;
- working with County Council colleagues to develop and roll out the installation of high speed broadband across the Winchester District and wider Hampshire;
- developing a cultural strategy as a basis for securing developer contributions to support our valued cultural organisations and infrastructure;

The outline Change Plans for each of the three outcomes of the Community Strategy and the Council's own corporate 'efficient and effective' outcome have already been adopted by Full Council at its meeting of [24 February 2011](#). The Detailed Plan attached has been the subject of wide discussion with partners and colleagues, and has most recently been considered by the Local Economy Scrutiny Panel at its meeting of [8 March](#). Amendments proposed through the consultation process have been discussed with the Portfolio Holder for Economic Prosperity and incorporated as appropriate.

The Assistant Director is satisfied that the actions put forward in this Change Plan will contribute towards the economic prosperity outcome, as set out in the Sustainable Community Strategy 2010 – 2020. They will form the basic 'menu' for much of the commissioning by the Council in 2011/12. In the main, targets will be achieved within the resources available, including the newly created commissioning budgets. Where this is not the case, further reports will be brought to Cabinet for consideration.

DECISION

That the Detailed Change Plan for Economic Prosperity be approved as attached at Appendix 1.

REASON FOR THE DECISION AND OTHER ALTERNATIVE OPTIONS CONSIDERED AND REJECTED

The Detailed Change Plans form an important part of the Council's performance management process, setting out programmes of work for the coming year and providing clear guidance on the allocation of resources both

by the Council and its partners. The Plan put forward for adoption sets out the actions that will best help the Council achieve the economic prosperity outcome as set out in the Sustainable Community Strategy, and to meet its statutory obligations within the resources available to it.

As indicated above, the Local Economy Scrutiny Panel has been consulted on the Change Plan and raised a number of issues as detailed in the [minutes of the meeting](#). A number of these issues have been dealt with through other channels, but two are directly relevant to the completion of the Change Plans as follows:

- a) the need to add an action to ensure appropriate representation of rural interests by the newly formed Local Enterprise Partnerships. This has now been included.
- b) the need to continue monitoring 'business as usual' by the Council's services, through a range of performance indicators. This work is already in hand, with a series of training events being organised for Heads of Team in May.

Councillor Dominic Hiscock - Portfolio Holder for Economic Prosperity

Economic Prosperity Theme 1

We exploit the District's cultural strengths, heritage and historic environment, alongside its good transport and communication links and its excellent education facilities, to stimulate a modern and creative approach to business.

Why is this important?

Winchester's economic wellbeing relies on a complex mix of cathedral city appeal and contemporary creativity. We can use the advantages of the former to underpin the quality of our offer to businesses. However, we must position the District as a modern and innovative location if the businesses of tomorrow are to establish themselves here, and in so doing help to ensure that we have a diverse and prosperous economy in the future.

Why act now?

- We are entering a period of severe austerity measures in the wake of a recession. Private sector investment in the District will help to provide jobs and vitality in these difficult times.
- The public sector is set to contract rapidly over the next three years, creating opportunities for an innovative use of public sector estate to meet identified local needs.
- We need to build our knowledge and creative industries as a sector because they bring high value jobs to the District, and can help reduce commuting.

What existing work can we build on?

- The Economic Strategy for the Winchester District 2010-20
- The Winchester Town Access Plan
- The work of the two universities in fostering graduate start-ups
- The contribution of our arts and cultural organisations to the quality of life of the District, which is a key attraction for entrepreneurs.

What can we do in the future with partners?

- Lead by example in using our own estate to address workspace deficiencies
- Develop planning policies to support the growth of new and growing businesses in our five core sectors

Link to other programmes

HIGH

Volunteers are key to sustaining successful cultural life in the District

Active
Communities

HIGH

Supporting delivery of the economic strategy

Prosperous
Economy

HIGH

Nurturing the development of low carbon knowledge-based industries

High quality
Environment

LOW

Opportunities for entrepreneurship at any age

Older People

MEDIUM

Providing workspace in accessible locations

Access to
Services

HIGH

Reducing the need for unnecessary journeys to work

Reducing District
Carbon Footprint

LOW

Providing new jobs in town centre

Priority
Neighbourhoods

- Work with Winchester Cathedral, the Theatre Royal, Winchester Hat Fair and other iconic cultural institutions to reinforce Winchester's image as an attractive location for business.

How will we measure success?

- Successful completion of actions identified in this plan
- Positive direction of travel measured by performance indicators in this plan
- Number of VAT registered businesses in the District increased from 5,475 to 5,800 by end 2015

What changes are needed to achieve progress?

- Introduction of new Local Development Framework with core policies in economic development
- Greater involvement of our creative community in developing projects and plans for the District
- A greater focus on place marketing for inward investment purposes.

EP/004.1a	Cultural Strategy for Winchester District	We have a cultural strategy in place which provides the best justification for future developer contributions and funding to be spent on projects, services and facilities which make the District a great place to live for all	01 Apr 2011	Review 2010 Cultural Infrastructure Study and approve final version as evidence base for strategy	30 Apr 2011	31 Dec 2012	Eloise Appleby

Economic Prosperity Theme 2

We are building a low carbon economy, seeking competitive advantage and sustainable employment opportunities for local people

Why is this important?

Over the long term, the Winchester District needs to develop a more diverse economy and to foster new, high value sectors. A low carbon economy brings with it sustainable jobs, with new occupations for professional and manual workers alike. It means expanding the number of businesses developing and delivering low carbon technologies, but also reducing the greenhouse gas emissions of existing businesses. Low carbon technologies and manufacturing will be a major growth area over the coming years. The development of a competitive low carbon economy in the Winchester District represents a sound financial, pragmatic and ethical choice to ensure our future wellbeing.

Why act now?

- As a nation, the UK has been slow to respond to the threats and opportunities of climate change. Winchester can benefit commercially by stimulating the development of a new sector.
- Businesses need to respond not only to the threat of climate change, but also to recognise the – perhaps more immediate – challenge of ‘peak oil’ as availability of the world’s fossil fuels rapidly diminishes.
- The public sector is set to contract rapidly over the next three years, and the vacuum needs to be filled with new jobs for local people. ‘Green collar’ jobs can provide sustainable long term alternatives.
- Businesses of all sizes can find adaptation to low carbon practices a challenge. There is a great deal of practical, low cost support that we can provide to help existing enterprises reduce their carbon footprints.
- Customers are increasingly looking for good environmental credentials when selecting suppliers.

What existing work can we build on?

- The Economic Strategy for the Winchester District 2010-20
- The High Quality Environment Action Plan for the Winchester District

Impacts on other programmes

Active Communities

MEDIUM

WinACC volunteers will play an important role business adaptation

Prosperous Economy

HIGH

Supporting delivery of the Economic Strategy

High quality Environment

HIGH

Makes a direct contribution to a high quality environment

Older People

LOW

Opportunities for retraining at any age

Access to Services

MEDIUM

Providing new jobs, potentially in more accessible locations

Reducing District Carbon Footprint

HIGH

Reducing carbon footprint of our business community

Stanmore and Winnall

MEDIUM

Potential for pilot skills project for Stanmore/Winnall town centre

- Winchester Town Action Plan
- The activities of Hampshire's Sustainable Business Partnership and Winchester Action on Climate Change (WinACC) across the Winchester District
- The University of Southampton's work on environmental management programmes and degrees

What can we do in the future with partners?

- Position the Winchester District as a sympathetic location for a low carbon economy
- Develop planning policies to support the growth of low carbon business
- Work with Job Centre Plus, Sparsholt College and the Winchester Construction Network (Sustainable Business Partnership) to address a lack of trained workers in green construction.

How will we measure success?

- Successful completion of actions identified in this plan
- Positive direction of travel measured by performance indicators in this plan (eg the number of green collar jobs created)
- Reduction of Winchester's CO₂ emissions (10.7 tonnes per capita in 2010, based on Hampshire Economic Partnership key data sheet) towards the regional figure (7.8 tonnes per capita in 2010)
- Number of businesses with carbon reduction targets and their success in meeting those targets

What changes are needed to achieve progress?

- Full engagement of the business community
- Introduction of new Local Development Framework with core policies in economic development
- An innovative approach to funding for investment in low carbon infrastructure
- An iconic 'statement' to demonstrate and celebrate Winchester's aspirations to be a greener district.

				2012/13 business plan targets met	31 Dec 2013		

Economic Prosperity Theme 3

We make the most of local opportunities to enhance the skills and ambitions of those who live in the District.

Why is this important?

Enterprise is the key to a healthy economy. By encouraging its creative thinkers and its entrepreneurs, the Winchester District will benefit from new businesses fit for the market opportunities and consumer expectations of the coming years. But everyone has a part to play in our economy, and people should be empowered to make the contribution which best suits their talents and aspirations. Our economy should be an inclusive one, where barriers to reaching our potential are reduced and everyone can participate.

Why act now?

- The 2012 Olympic and Paralympic Games are a catalyst for volunteering and training to get people into work: one legacy of the Games in Winchester should be to maintain this momentum.
- The economic downturn will make it harder for people to find jobs in the short term: entering the workplace will be difficult for young people, even with higher qualifications, and older people may find they need to retrain for new jobs.
- Our definition of economic prosperity is that everyone has enough: decent housing, a good quality of life and a fulfilling job. We should do more to provide learning and workplace opportunities for those who do not yet 'have enough', and in particular those who will be affected by the national reduction in welfare payments.
- The rising cost of higher education means that we must explore different approaches to developing the workforce of tomorrow.

What existing work can we build on?

- The Economic Strategy for the Winchester District 2010-20
- New approaches being piloted by Sparsholt College
- The work of the Community Learning Forum
- The Sports and Physical Activity Alliance Action Plan for the Winchester District

Impacts on other programmes

Active Communities

HIGH

A healthy workforce is a productive one. Volunteering as way in to work

Prosperous Economy

HIGH

Supporting delivery of the economic strategy

High quality Environment

MEDIUM

Skills may support development of low-carbon economy

Older People

LOW

Opportunities for volunteering and retraining at any age

Access to Services

MEDIUM

Providing training to suit individual needs rather than in hard-to-reach locations

Reducing District Carbon Footprint

LOW

Skills may support development of low-carbon economy

Stammore and Winnall

HIGH – *Project to get NEETS in these areas into work*

What can we do in the future with partners?

- Work more closely with training, employment and education agencies/organisations to reduce duplication and identify gaps in provision
- Increase support for young people entering the workplace from school, college or university
- Devise new and individual approaches to help those who are not in employment, education or training

How will we measure success?

- Successful completion of actions identified in this plan
- Positive direction of travel measured by performance indicators in this plan
- Reduction of unemployment to pre-recession figure of less than 1%
- Increase the total number of residents with NVQ3 level or above qualifications from 39,000 to 41,000

What changes are needed to achieve progress?

- Better ways of engaging employers in long term training and development initiatives
- Recognition of the positive contribution made by young people and young adults to the economy and vibrancy of the area
- Development of person-centred rather than building-focussed training

Economic Prosperity Theme 4

Businesses are good neighbours

Why is this important?

Businesses have always played an important role in community life. As well as providing jobs for local people, they make a host of contributions ranging from financial support for local voluntary groups to work placements for students, and from major contributions to facilities such as the Winchester Sports Stadium to working with public organisations to develop policy for the future. With high commuting figures across the District, Winchester businesses may be seen to draw in 'outsiders' and create a disjointed society. Successful businesses are those that demonstrate a genuine interest in the District and play an active role in community and civic life.

Why act now?

- The economic climate is likely to lead to low morale in the coming months as people manage on reduced household budgets and many contend with worklessness. Businesses can play a part in offering work placements, making funding available for local voluntary groups, supporting special events and so on.
- When the housing market starts to grow again, developers should be encouraged to make positive financial contributions to local community and cultural facilities that can be enjoyed by everyone.
- New, cheap technologies make it possible for companies to build meaningful relationships with customers. There is good scope to improve access to services and extend choice for local people through greater use of web-based applications.
- Businesses need to be involved in building the future of the Winchester District. Their voice and their insight are needed. However, we should also be celebrating the achievements and contributions of the many local businesses which help to make Winchester a successful and vibrant place today.

What existing work can we build on?

- The Economic Strategy for the Winchester District 2010-20

Impacts on other programmes

Active Communities

HIGH

Businesses are an integral part of our community

Prosperous Economy

HIGH

Businesses which are integrated into the community are more likely to thrive

High quality Environment

HIGH

Corporate social responsibility leads to a commitment to carbon reduction

Older People

MEDIUM

Corporate responsibility and pre-retirement programmes

Access to Services

MEDIUM

Greater use of technologies will provide more accessible services for local people

Reducing District Carbon Footprint

LOW

Skills may support development of low-carbon economy

Stammore and Winnall

HIGH

Businesses can make a direct contribution to these communities

- The work of the Winchester Business Improvement District, Chambers of Commerce and other business networks
- The success of initiatives such as the Winchester Business Excellence Awards

What can we do in the future with partners?

- Improve communications with businesses across the District to ensure that they feel involved and engaged
- Make it easier for businesses to work together by fostering new sector-specific networks and improving telecommunications
- Include a policy on developer contributions for community infrastructure in new Local Development Framework

How will we measure success?

- Successful completion of actions identified in this plan
- Positive direction of travel measured by performance indicators in this plan
- Number of businesses participating in network and consultation events
- Productivity GVA rising steadily to equal the regional figure

What changes are needed to achieve progress?

- Introduction of new Local Development Framework with Community Infrastructure contributions policy
- Better communications with businesses, especially those outside the Winchester Town area
